

Blackpool Borough Council

Maintenance & installation services

- design ●
- project management ●
- installation ●
- testing commissioning ●
- maintenance ●

Blackpool Borough Council has a long standing relationship with Banson Electric for 24/7/365 days a year maintenance, planned maintenance & installation services for the Blackpool and Fylde areas.

Banson Electric work in many sensitive buildings that require them to work in and around people as many of these buildings are in operation whilst works are undertaken. Health & Safety is therefore always a priority when working for Blackpool Borough Council in buildings such as:

- Infant Schools
- Primary Schools
- Secondary Schools
- Special Schools
- Community Centres
- Care Homes
- Public Buildings
- Council owned offices
- Exhibition & Conference Centres
- Leisure Centres

Our fully qualified electricians that attend these sites arrive in both branded vehicles and work wear with identification badges. Often our operatives work towards timed appointments and take an open and consultative approach to the specific clients needs.

Our aim is to limit any disruption on site and complete the necessary works for our client in the safest and shortest time possible in a safe manner.

Banson Electric, a safe electrical installation and maintenance service.
