Renault Bolton c.£200,000
Renault Liverpool c.£110,000
Electrical Consultant: TBA

Banson Electric undertook the full electrical fit out through competitive tender for a New Build development for Renault in Bolton. This scheme comprised of the full electrical services fit out for a new build showroom; garage; offices; external forecourt and used car showroom.

Services that were used for this scheme included:

- Wiring for Building Management System
- Data & Telecom wiring installation
- CCTV wiring installation
- Emergency Lighting
- Full fire alarm installation
- Complete power and lighting supply
- Sub-mains and distribution
- Supply of electrical wiring to all garage equipment
- Signage service supply
- Lighting Design

The Bolton Renault scheme complied with all relevant BS standards and Part L regulations. The scheme was delivered on time and in full and as a result Banson Electric were considered for competitive tender for Renault in Liverpool. Banson Electric also won this refurbishment project.

The Renault Liverpool scheme was to refurbish the current showroom and reception areas, the following areas required the services of Banson Electric:

- Re-lamping of all offices
- Installation of services to the new reception desk
- Fire alarm alterations
- Emergency lighting alterations
- Power and lighting alterations
- New sub-main cabling to new car showroom
- Total rewire of used car showroom
- Signage service supply

Renault Liverpool was delivered on time and most importantly to budget. This case study highlights the continued successes that Banson Electric enjoys when dealing with new customers and that developing good working relationships with Banson Electric highlights.

Banson Electric, a safe electrical installation and maintenance service.
